

**Video screening in the hall of  
Stavanger Culture house may 26 – june 26**

## **Eyeseverywhere//ojosportodoslados**

This video shows a selected photographic work of 11 of the participating artists to the blog <http://eyeseverywhere.wordpress.com>, and who live in different cities and are also travelers.

**Eyeseverywhere//ojosportodoslados** was born at the end of 2006 from the need to share photographic findings with other artists, to connect women making art in other nations, and to offer an aesthetic approach in a constant flow. In January 2007, artists of different nationalities, living in different countries, started a weekly publication of photographs.

The flow of this image river marks now the fifth year online and it was time to pass from the digital to the rest of the world, to expand to other audiences and reach them with the multiple visions we have accumulated at

**<http://eyeseverywhere.wordpress.com>.**

Creating collaborative projects through the web has become a common alternative to widen geographic and creative horizons. It allows building global artistic and social nets that can transcend the digital and become concrete projects, both personal and professional.

"We have contributed in how we perceive this world through a specific theme that changes monthly. From Doha, to Montevideo, from México City to Kuala Lumpur to Stavanger, our visual reflection has tackled subjects that embrace human sight through art. "

***Elizabeth Ross, creator of the project***

### The Artists :

Agnes Btfn – France / Norway	Aimee Lee – Korea / US
Carolina de la Peña – Mexico City	Elizabeth Ross – Mexico / Spain
